

# SUN2000 Inverter supports partially optimized with MERC-600W-PA0 Optimizer

## 【Solution Changes】

## 【Commissioning step】

Step 1: Upgrade the inverter software to the versions listed in the following table.

Step 2: You do not need to upgrade the MERC-600W-PA0 software. All versions support partially optimized function.

Step 3: Perform the “Quick setting”.

If the quick setting is performed first, the inverter will have an alarm, you can ignore it and upgrade the inverter, then perform the quick setting again

## 【Software Version】

Inverter Model	Software version
SUN2000-2/3/3.68/4/4.68/5KTL-L1	SUN2000L V200R001C00SPC153
SUN2000-3/3.68/4/4.68/5/6KTL-LB0	SUN2000LB V300R024C00SPC108
SUN2000-3/5/6/8/10KTL-M1	SUN2000MA V100R001C00SPC174
SUN2000-12/15/17/20/25K-MB0	SUN2000MB V200R023C10SPC213
SUN2000-5/6/8/10/12K-MAP0	SUN2000MA V200R024C00SPC108
