LAN

Communication module

Technical Parameter

Basic Parameter	
Input voltage	5V
Power	1.5W
Size (length * width * thickness)	91.5mm*65mm*39.5mm
Operating temperature range°C	-25 ~ 60
Operating humidity	5 ~ 95% RH (Non-condensing water)
Operating altitude	<4000m
Ethernet interface	
Port	RJ45
Lead length	0.5m
Water Protection	IP65

Software parameter	
Configuration	Http web page configuration
Language	Chinese, English
Transmission rate	UART:115200bps Ethernet:10/100M Ethernet adaptation
Maximum transmission distance	80m
Supporting device	Router, Switch
Certification	FCC/CE/RoHS

Features

· High speed and reliable transmission using network cable

· Support breakpoint retransmission, automatic disconnection of communication broken links, reconnection and subsequent transmission to ensure data is not lost

· Support remote upgrade, you can upgrade the inverter program without visiting the site
